

Acutrak® 3

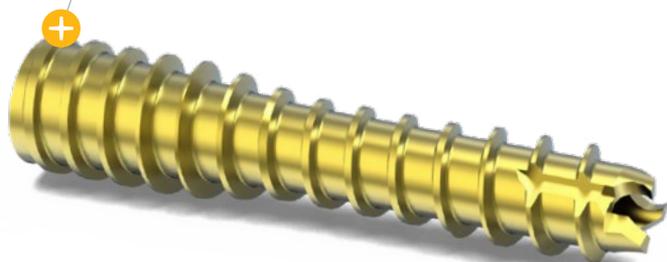

Headless Compression Screw Solutions

Continuously Variable Fully

Threaded Pitch provides multiple points of fixation and a wide window of compression. The fracture does not have to be in a specific location due to fully threaded design

Headless design allows the screws to be implanted subchondral in and around articular regions with **minimal risk of impingement or soft tissue irritation**

Trusted 3 Million Times
by Surgeons Worldwide

Acutrak 3

3+ Trusted Over
3 Million Times
Million

Acutrak Headless Compression Screw technology has been providing surgeons with operational efficiency and excellent patient outcomes through its ease of use and stable fixation. Since 1994, Acutrak has been trusted over three million times and continues to be refined based on surgeon feedback.

Acutrak 3 is the latest innovation and is composed of 93 unique screws, including a new 2.0 mm diameter Nano screw and extensions to the existing lengths of the Micro, Mini, and Standard screws, expanding on the many indications historically treated with the Acutrak 2 System.

Acutrak 3 Range of Sizes

Additional Sizes from Second Generations

4.0 Standard	3.5 Mini
2 mm increments 16-60 mm	2 mm increments 12-60 mm

2.5 Micro	2.0 Nano
1 mm increments 8-14 mm	1 mm increments 8-14 mm
2 mm increments 14-50 mm	2 mm increments 14-40 mm

2.0 Nano – Scaphoid Fracture

2.0 Nano – DIP Fusion
